LOCATION

# Pass Through Spacer

LODESTAR Accessory

## DESCRIPTION

When you need to add height to your photocontrol, the Pass Through Spacer is ideal for raising the device by 2.5". There are many decorative fixtures with recessed receptacles that cover the photocontrol window, thereby inhibiting the photocontrol's ability to properly detect light levels. This will affect the turn on / turn off levels of the photocontrol. By raising the height, the photocontrol can be moved to a position with an unobstructed view of the sky.

## TECHNICAL DATA

Voltage Rating	120-480 VAC	Will also work with DC Photocontrols
Current	10 Amps	Continuous AC
Operating Temperature	-40 °C to +70 °C	-40 °F to +158 °F
Housing	Polypropylene Gray	UV Stabilized, Impact Resistant
Base	Polycarbonate 140 °C	UL94HP Flame Class Rating
Gasket	Neoprene	ASTM D1056
Blades	Solid Brass	Three Prong, Locking Type

## ORDERING INFORMATION

Product	Description
TLA-PS-3P	3 Pin Pass Through Spacer
TLA-PS-7P	7 Pin Pass Through Spacer
